

COMING 03/2019

POLICY BRIEFS SOLUTIONS

All detailed Policy Briefs will be available online in March 2019.
The following topics are addressed:

1. Address mixtures of contaminants
2. Advance assessment and prioritization of emerging contaminants and mixtures
3. Integrate effect-based tools into monitoring of water quality
4. Use models to support monitoring and to fill tentative data gaps
5. Improve and harmonize monitoring to link ecological and chemical quality
6. Ecological tools
7. Use solution-oriented assessments to achieve a non-toxic environment
8. Increase coherence of cross-compliance of chemicals and water regulations
9. Strong integrated European research on water quality and chemicals in the water-food-energy security nexus is required to safeguard welfare and sustainable development in Europe
10. Don't worry about big data: Opportunities for a better monitoring and assessment using chemical screening technologies
11. RiBaTox – Dissemination of SOLUTIONS Tool and Services for River Basin Toxicants
12. Chemical status
13. Need for open and transparent database on toxicity data, data scarcity
